パケットの種類 ~ kinds of packets

packet name

included information

| 種類 | パケット名称 | 含まれる情報 |
|----|---------------------------------|--|
| A | connection packet 接続パケット | 送信元コンピュータ情報 宛先コンピュータ情報 |
| B | authentication packet 認証パケット | ユーザ情報 |
| C | 対象指定パケット | action object information アクション対象情報 |
| D | command packet 命令パケット | action information アクション情報 |
| E | data packet データパケット | データ data |

object specification packet

Prior Art

| Packet number | Sending source destination | Content of packet |
|---------------|----------------------------|--|
| 1 | C → S | Session start request (packet includes sending source computer information and destination computer information) |
| 2 | S → C | Response to session start request |
| 3 | C → S | Authentication request (1) (packet includes user information) |
| 4 | S → C | Authentication request (1) request client to send authentication information |
| 5 | C → S | Authentication request (2) send authentication information |
| 6 | S → C | Authentication request (2) send back authentication result |
| 7 | C → S | Connection request to shared folder |
| 8 | S → C | Response to connection request to shared folder |
| 9~18 | C ↔ S | Acquire information of root directory of shared folder (file list and file attribute of each file) |
| 19 | C → S | Repeat request and response |
| 20 | S → C | Open request of action object file (packet includes object file name) |
| 21 | C → S | Response to open request of action object file |
| 22 | S → C | Acquisition request of file storage area information |
| 23 | C → S | Response to acquisition request of file storage area information |
| 24~33 | C → S | Writing request into file (start writing into object file) |
| 34 | S → C | Send data written into file |
| 35 | C → S | Response to writing request into file (send back result of writing into file) |
| 36 | S → C | Close request of file |
| | | Response to close request of file |
